## DETAILED ACTION

This application is a rule 371 continuation of PCT application PCT/EP98/04219.

Claims 1-34 have been canceled.

New claims 35-84 have been added and are currently pending in this application.

5

1. The numbering of claims is not accordance with 37 CFR 1.126. The original numbering of the claims must be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When claims are added, except when presented in accordance with 37 CFR 1.121(b), they must be renumbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-50 have been renumbered as 35-84. If any more claims are added, they should start with claim 85. To avoid confusion, reference should be made to renumbered claim numbers in the future because they are the official claim numbers.

**Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-305-3704. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

### *Election/Restrictions*

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, Applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

30

Group I, claim(s) 35-50, drawn to a method of inactivation a target cell in the presence of T cells using a targeting agent, superantigen and an immune modulator.

5 Group II, claim(s) 51-84, drawn to conjugates of targeting agents with superantigens and/or immune modulators, DNA encoding said conjugates and pharmaceutical preparations comprising said conjugates.

10 3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims are broadly drawn to combinations of targeting agents, superantigens and immune response modulators, however, there is no requirement in the composition claims of Group II that the superantigen and immune response modulator be directed toward T cells. Superantigenic molecules which stimulate B cell activity without stimulating T cells are also known and usable in the presence of a target cell.

15 Accordingly, the claims are not so linked by a special technical feature so as to constitute a single inventive concept.

20 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

25 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
